For information in alternative formats, call 1-800-201-4900/
TTY Relay: 711 or email accessibility@soundtransit.org.

To speak with Sound Transit during regular business hours about a Link light rail project call 1-800-823-9230 (translation services available) or call 206-398-LINK to reach Sound Transit Community Outreach.

በመደበኛ የሥራ ሰዓት ስለ Link ላይትሬይል ፕሮጀክት ከ Sound Transit ጋር ለማነጋገር በ 1-800-823-9230 ይደውሉ (የአስተርጓሚ አገልግሎት ይኖራል) ወይም የ Sound Transit የማህረተሰብ የቅስቀሳ አገልግሎትን ለማግኘት በ 206-398-LINK ይደውሉ።

欲在例行辦公時間跟 Sound Transit 談論有關 Link 輕鐵計劃事宜，請致電 1-800-823-9230 (可提供翻譯服務) ，或致電206-398-LINK與 Sound Transit 社區外展聯絡。

برای صحبت با Sound Transit در باره یک پروژه سبک راه اهن Link در طول ساعات کاری معمولی در روز با شماره 1-800-823-9230 (خدمات ترجمه موجود است) و یا برای تماس با انجمن Sound Transit با شماره 206-398-LINKتماس بگیرید.

Link(링크)에 대한 문의가 있으시면 일반 영업 시간 동안 1-800-823-9230(통역 서비스 제공 가능)으로 Sound Transit(사운드 트랜짓)에 전화하시거나, 206-398-LINK로 Sound Transit Community Outreach(사운드 트랜짓 커뮤니티 아웃리치)에 연락하십시오.

Чтобы поговорить с работником Sound Transit в обычные рабочие часы о строительстве Link light rail, звоните по телефону 1-800-823-9230 (предоставляются услуги переводчика) или звоните по телефону 206-398-LINK, чтобы связаться с отделом Sound Transit по связям с населением.

Para hablar con Sound Transit durante el horario normal de oficina acerca de un proyecto del Link light rail, llame al 1-800-823-9230 (hay servicios de traducción disponibles) o llame al 206-398-LINK para comunicarse con el Enlace Comunitario de Sound Transit.

Upang makipag-usap sa Sound Transit habang sa regular na mga oras ng pangangalakal ukol sa proyektong Link light rail, tawagan ang 1-800-823-9230 (may magagamit na mga serbisyong pagsasaling wika) o tawagan ang 206-398-LINK upang makontak ang Sound Transit Community Outreach.

Để nói chuyện với Sound Transit trong giờ làm việc thường lệ về dự án hỏa xa nhẹ Link, xin gọi số 1-800-823-9230 (có dịch vụ thông dịch) hoặc gọi số 206-398-LINK để liên lạc Sound Transit Community Outreach (Ban Tiếp Cận Cộng Đồng Của Sound Transit).

PROJECT UPDATE

Operations & Maintenance Satellite Facility

ENVIRONMENTAL REVIEW

MARCH 2014

SOUNDTRANSIT

Looking FORWARD

The Link Operations & Maintenance Satellite Facility (OMSF) site alternatives have been identified and environmental review is underway. The Draft Environmental Impact Statement (DEIS) is anticipated in mid-2014. Once released, a public review and comment period will begin. Public comments will be collected and the Sound Transit Board of Directors will review all the information prior to identifying a Preferred Alternative for the OMSF.

Site Alternatives Identified (2013) → **Environmental Review (2013-2014)** → **Record of Decision & Permitting (2015)** → **Construction (2016-2020)** → **Targeted Project Completion 2020**

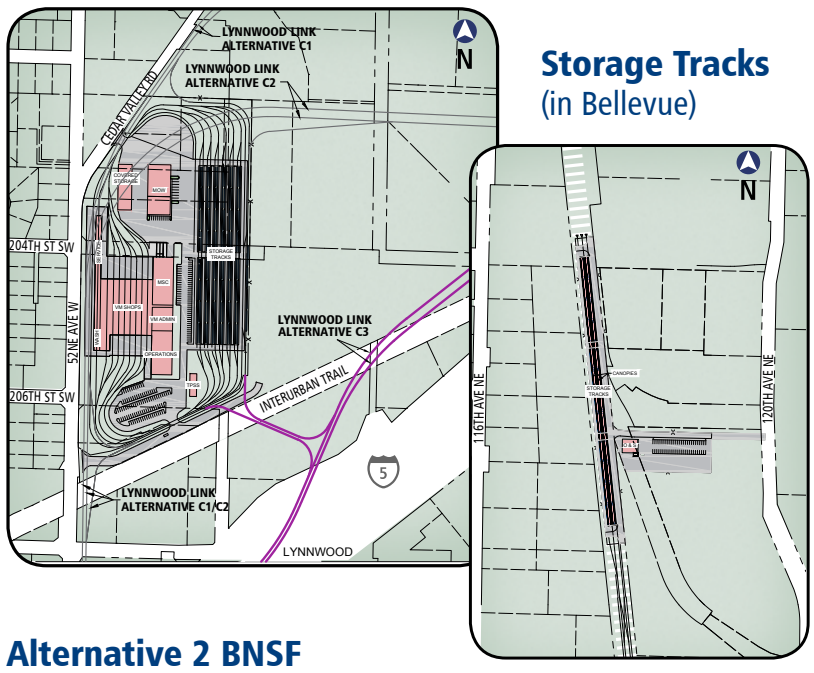
Detail of potential sites

Why we need the Operations and Maintenance Satellite Facility (OMSF)

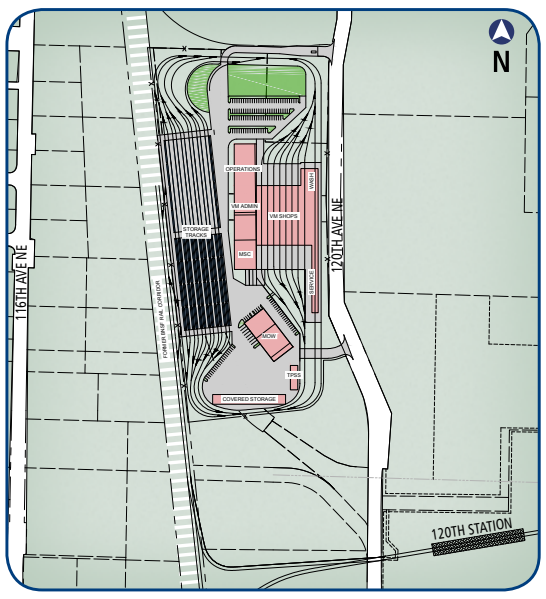
Sound Transit is dramatically expanding the region's Link light rail system to the north, south and east. This expansion, approved by voters in 2008, extends the existing 16-mile system to approximately 50 miles and will triple the existing fleet of light rail vehicles. The current light rail operations and maintenance facility (OMF), located in the SODO area of Seattle, is not large enough to handle the additional vehicles.

In order to help store and maintain those vehicles and support efficient light rail operations, Sound Transit must build an operations and maintenance satellite facility (OMSF) by 2020. Potential sites for this facility are located in Lynnwood and Bellevue.

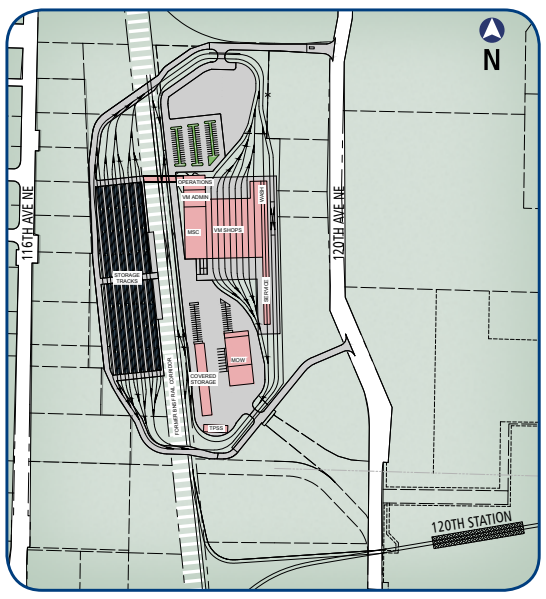
Alternative 1 Lynnwood



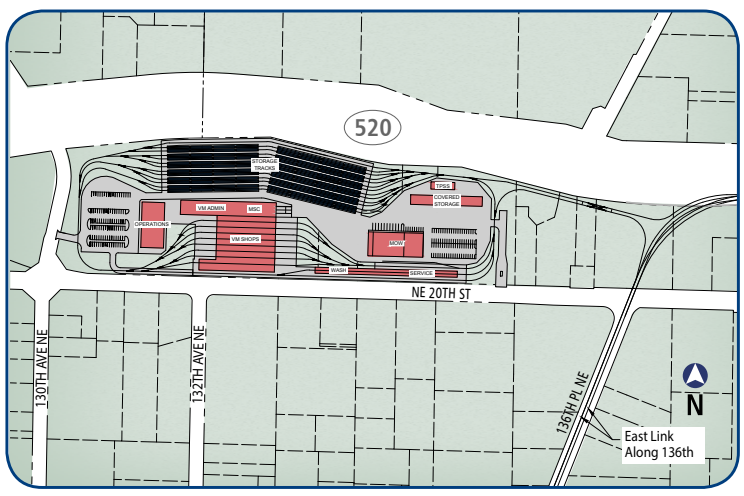
Alternative 2 BNSF

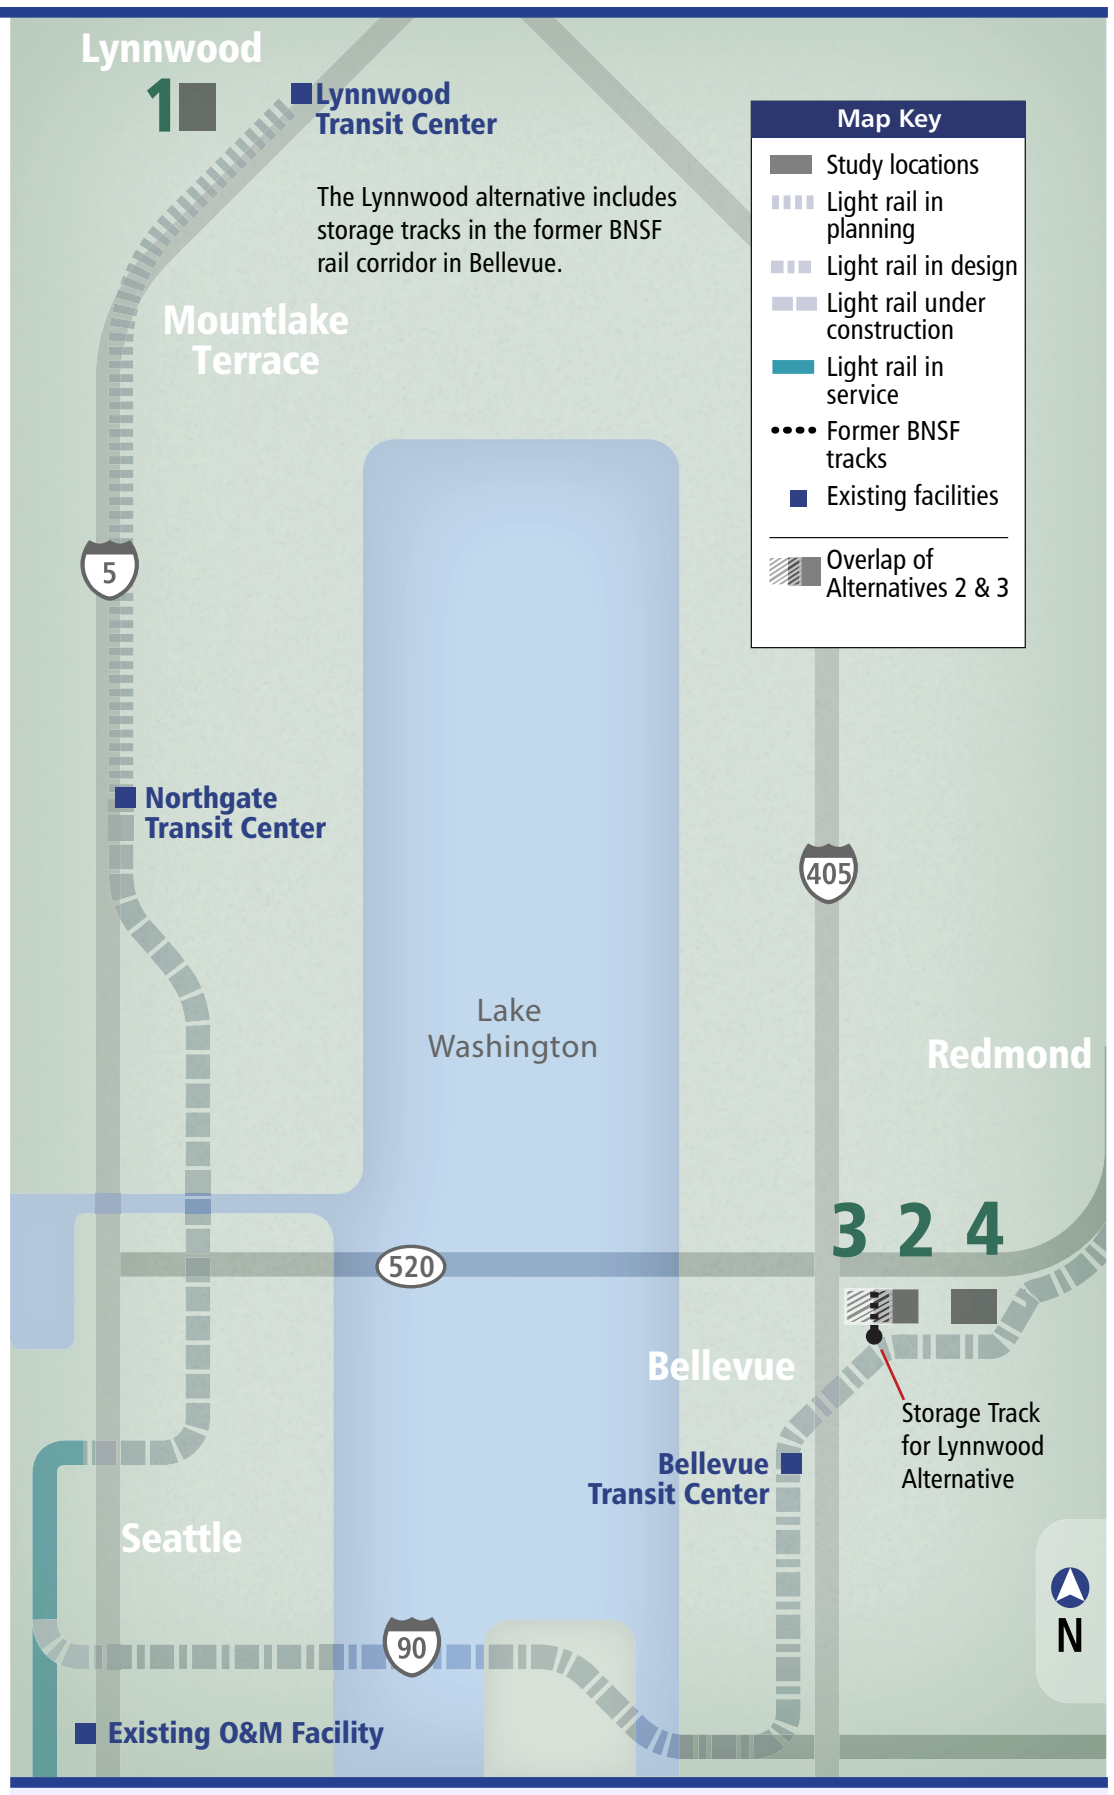


Alternative 3 BNSF Modified



Alternative 4 SR-520





What is Environmental Review?

In the fall of 2012, the Sound Transit Board of Directors identified four OMSF alternatives to be studied in an Environmental Impact Statement (EIS). Sound Transit, together with the Federal Transit Administration (FTA), is currently preparing the Draft EIS with a target publication and public comment period currently slated for mid-2014. This Draft EIS will:

- Describe the alternatives and their potential environmental impacts.
- Provide environmental information to assist decision makers in identifying a preferred alternative.
- Identify measures to avoid and minimize impacts and, when necessary, mitigate adverse impacts.

After the Preferred Alternative is identified by the Sound Transit Board, a Final EIS will be prepared that includes responses to public comments.

Siting and operational requirements

The OMSF's unique physical and operational requirements greatly limit the number of potential sites. For example, sites must be 20-25 acres, roughly rectangular in shape and close to an existing or future light rail line.

Operational requirements include minimizing system operating costs, preserving the daily vehicle maintenance window and ensuring that Sound Transit can provide service at peak commute times.

Link extension

The OMSF site is needed to support and maintain the additional light rail vehicles required for efficient and reliable service of Link expansion projects. This includes extending service to Lynnwood, Bellevue and Overlake, and Kent/Des Moines.

What's next?

In mid-2014 Sound Transit will complete and publish the OMSF Draft Environmental Impact Statement (DEIS) for your review. Local communities and project stakeholders will be invited to formally comment on the Project and DEIS.

- The Sound Transit Board will consider comments recorded online and at public hearings in Bellevue and Lynnwood.

Want to get involved and comment?

- Subscribe online to project updates by e-mail or text alert to stay informed and participate:
  - soundtransit.org/Subscribe.
- Look for your mailed notice later this year and attend a public hearing where you can:
  - Meet project staff and learn more.
  - Record comments and provide formal feedback on the Project and DEIS to the Sound Transit Board for review during the site selection process.

To request additional information or a briefing call 206-903-7752.
